DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I, claims 1-37 in Paper No. 9 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5, 8, 12 15-20, 24-25, 27-28 and 30-37 rejected under 35 U.S.C. 102(e) as being anticipated by Bacho et al., U.S. Patent No. 6,423,805 (hereinafter "Bacho"). Bacho teaches a polymer composition comprising a

copolymer with a Tg of from -40°C to 30°C. The polymer comprises methacrylates, acrylic acid, hydroxyalkyl (meth)acrylates and styrene. See Bacho, col. 2, line 48 through col. 3, line 60; col. 5, line 45 through col. 6, line 42; Example 9. Examining the claims in the broadest light possible, Bacho anticipates claims 1-5, 8, 12 15-20, 24-25, 27-28 and 30-37.

4. Claims 6-7, 9-11, 13-14, 21-23, 26 and 29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
